

I have been at a good deal of pains
to get the information you want. As I now under-
stand it, Shandy assigned to Fogg, three notes, a
constant, two of them for \$150 each, one due one
year after date, & the other due in two years, both
dated May 9th 1839, - the other for \$45- due
one year after date, dated May 10th 1839- on the
last, there is a credit of \$18-00. as of June 16th 1841-
Constant had a mortgage against White
to secure four notes, the three of them, for
\$250 each, and the fourth for \$450- he
sold three of the notes & retained one of the
\$250 ones. The mortgaged property was sold on
the 27th day of August 1844. for \$550- and it
has not been redeemed. It was sold for the relative
benefit of these four notes, and consequently the
ratio of the 250 note retained by Constant goes
to Fogg. Its ratio, as I count it, is \$114.58 2/3 cents
to be credited on the Shandy notes as of date
27th August 1844- The balances of these notes
remain unpaid - This
