For Mayor of the City of Springfield : ALFRED E. ELDER.

GENERAL TAYLOR. most universally associated with the idea of the want of his own consent, can possibly prevent his election. If we be right in this, what the nation may reasonably hope from his administration, becomes a deeply interesting question. He is known to be a Whig; and with this exception, and what may be safely inferred from it, we believe nothing is gen erally known of his politics. We are to judge of the the rest, from the characteristics of the man, as manifested through his now long military life. If patient, unremitting attention to the tasteless details of business, be a requisite qualification of a President, then surely the friends of Gen. Taylor may well claim, that the thirty years of laborious and tedious peace which he has spent in the camp, prove him to possess it, in an eminent degree. If to be equal to any emergency that may suddenly arise, and take one at disadvantage, be a requisite; then surely, what history tells of him,-first on the Wabash, then in Florida, and now in Mexicoleaves no room to doubt. If to be above all personal pers leaves no room to doubt. If to be above all person mane disposition, and a sincere love of peace, capacities for war, when war must be,) Gen. And finally, if to remain plain, practicable, business like and vigilant, amid the shouts of applause-if to remain unintoxicated by the draughts of adulation, and undazzled by the glare of glory, -be a most rare and befitting quality in him who ria Register thus writes from St. Louis: is to stand at, and steady, the helm of this mighty nation, then who, we ask, possesses this, in so eminent a degree as Gen. Taylor?

We conclude that, shall he be President, his administration can not fail to be free, from that duplicity, weakness, and vacillation, which have chara bad one in any particular. We are for him.

INCREDIBLE RUMORS—Monarchy in Mexico.—Rumors of a monarchy in Mexico, come to us through the New York Herald, from Havana. They intimate that France, England and Spain have concured in a propisition from Spain to restore a monarchy in Mexico, and place the son of Isabella, Don Enrique, on the throne. Gen.O' Donnell, of Cuba, is said to have received orders to have troops ready to embark for Mexico, when Don Enrique

Hardin fell upon us, our little stock of philosophy was at once crushed through; and the sad intelligence wrough upon us, as if we had never expected it. The pain ful reality pressed much closer than anticipatio could ever do. What we say of ourselves is true of the whole community here. Oft and again has the cheek of manhood, even, been coursed by the generous tears for his fate. This, especially, when it was learned, that uselessly for the enemy's cause, he was murdered, while bleeding and prostrate on the field. We had striven to believe the Mexicans, a people, inclined at heart, to civilization; but when we think of their needless and inhuman butchery of Col. Hardin and others, we do feel that the world would not be worse, if they were swept from the face of it.

Santa Anna took three small pieces of our artillery, which, under Lieut. O'Brien, had been posted too far in advance to be covered by our infantry. All the gunners were shot down, and when the guns were captured there was not a soldier left to man them. One of these pieces was an old Texan sixpounder, which, during the Texan Revolution, had done good execution among the Mexican ranks.—As to the flags he boasts of having taken, they were very probably mere company markers, which were dropped on the field and picked up by the valiant of the interview, and the battle was recommenced, and that regiment, and severely, if not mortally wounding two men.
