

To the Honorable the House of Representatives
of the United States

Your Petitioners would respectfully represent that the convenience of the Public would be much promoted by a daily Mail between Athens in Tompkins County and Bath in Warren Co. in the State of New York passing through Tompkins & Cayntaville in Tompkins County and Odessa Havana & Townsend in Channing Co and Monterey in Warren Co.

The above named places are rapidly increasing in population and wealth and already a vast amount of business is daily transacted in them and the community suffer great inconvenience and loss from the sparseness and infrequency of the mails.

Your Petitioners would further represent that that the route above designated is actually the most direct course and shortest (being about 50 miles between the above named places that can be found) and that the roads are in a sufficiently improved state for the transmission of mails in Post Coaches. And also that a daily Mail in stages would not only increase the business facilities ^{but} greatly add to the revenue of the Post Office Department.

We therefore pray that Congress will take immediate action upon this subject as it is demanded by the interest of the Community and the People generally.
