NEW PRINTING PRESS .- Some time since, Mr. Geo. Bruce, of New York, offered a premium of \$1,000 to the inventor of a printing press, not to cost more than \$500, which would strike off 500 impressions per hour. Mr. Northrup, of Syracuse, New York, has invented a press, which the committee selected by Mr. Bruce, have examined, and have given its inventor a certificate, setting forth, that although it costs 20 per cent. more than in Mr. Bruce's specification, that it will throw off 1000, instead of 500 impressions per hour.

On the 10th ult. Mr. Ficklin introduced a bill into the House of Representatives, to protect actual settlers on the line of the Illinois central rail road, by granting pre-emption rights to them, which was read, and referred to the committee on public lands.

The Rock Island Advertiser of the 31st. says : The rail road is progressing rapidly, and its speedy completion is placed beyond a doubt. The proposals for building the bridge across Rock River, are all in, and one of them will probably be accepted.

A gentleman having been lately called upon to subscribe to a course of lectures, declined because, said he,

The Detroit Tribune of the 24th states that a despatch has been received from Mr. Brooks, stating that the May Fiower is uninjured in her hull, and that if wind and weather are at all favorable, the May Flower will be saved.

Be not discouraged by difficulties. These are chiefly at the start. The French proverb says truly : "It is only the first step that costs." The tree of knowledge has a rough trunk but delicious fruit. You must crack the shell, to come to the kernel. Bo assured that a little resolution will secure success.

The London Times says that the exports of Ireland are rags and wretchednees; her imports yankee newspapers and disaffection. The Times is getting personal. Mr. Bull should give him a cooling mixture.

What kin is that which all yankees love to recognize, and has always swest association connected with it?-The pumpkin to be sure,

Miss Fantadling says that if she ain't dead she has lost her vital "spark," the young man what used to love her, Poor girl, we pity her.

What is contentment? To sit in the house and see other people stuck in the mud. In other words, to be a little better off than your neighbor.

A youth who is not true to his employer will create habits that will be likely to disgrace him as a man .-When least thinking of it his baseness are known to those he styles his friends, and they watch his conduct distrust.

Arrival of the Cherokee.

NEW-YORK, January 1. The Cherokee brings dates to the 5th September; only 26½ days old; which is the quickest trip ever made. On the Colorado and vicinity, the Indians are daily assuming a more threatening attitude. The enforcement of the tax laws among the Indians, is said to be the ostensible cause of the rebellion, in which they have been assisted by the lower class of native Californians, who cherish the most bitter feelings against the authorities. The American volunteer companies or ganized at the south, have marched against them. The Governor has ordered Gen. Hitchcock to dispatch troops for that place forthwith, to the rescue of the citizens in the disturbed district. The Governor had also ordered down a detachment of troops stationed at Point Orford, and would probably dispatch one or more companies of volunteers from San Francisco, at an early date. There had been no change in the market since the 1st uit., but there was rather more firmness among

The Intelligencer states that his excellency, the Minster of France, communicated yesterday at the department of the Secretary of State, by directions of his government, and officially announced, that the President of the French republic, had adopted a great messure of public safety; that, as chief of the State, he offered to six millions of Frenchmen who had elected him, and to the world which had received his nomination, a new era in the tranquility of France, to prevent her from a revolution which would and might receil; that, strong in the conviction that he was repelling the danger which threatened France and Europe without end, he had invited the nation to a free choice and firm and desirable government; that he appealed to the suffrages of all, in a moment so solemn to the country, and that his appeal cught to enlighten the world in regard to his object.
